LITERATURE SURVEY

INVENTORY MANAGEMENT SYSTEM FOR RETAILERS

S.no	Title	Author	Year	Methodology	Pros and Cons
1.	Internet of things for perishable inventory management systems: an application and managerial insights for micro, small and mediumenterprises	Pratik Maheshwari, Sachin Kamble, AshokPundir, Amine Belhadi, Nelson Oly Ndubisi & SunilTiwari	2021	The study aimed to investigate the impact of IoT on existing operating parameters (holding cost, selling cost, deterioration rate, shortage cost, goodwill cost, unit purchase cost) and how it can increase the overall profit of retailers by reducing spoilage.	Pros: we formulated and analyzed IoT implementation costs in the retailerwarehouse Cons: They only focused on retailer benefits. They only considered deterministic demand rates with zero lead time.
2.	Two-stage inventory Management with financing under demand updates	TianyunLi, WeiguoFang, MelikeBaykal- Gursoy		The paper presents a recourse approach to solve the two-stage optimization problem and derive the optimal inventory/financing policies	Pros: This research incorporates the financial and operational decisions into demand updates, and brings new managerial results and insights. Cons: due to the complexity of the objective function, we do not have simple formulas for the optimal procurement policies, we providethe complete analytical description of the optimal solutions
3.	Design and implementation of a computer-based household inventory system	Laff non-Stop, Yonas Kebede		The research work embraces all activities of household inventory management valuation feasibility and liability but our	Pros: It is focus on valuation because the field area of household inventory is generated to acknowledge the importance of household inventory to

			study is narrowed down to the valuation of property as a way of bringing the work home	individual and the society at large. Cons: It doesn't support the small-scale industry which couldn't afford a computer.
Inventory managementfor retail companies: A literature review and current trends.	Cinthya Vanessa Muñoz Macas,jorge Andrés Espinoza Aguirre,Rodrig Arcentales-Car riónMario Peña	Mar 2021	They focused on solving all the retail issues that happened from 2015 to 2019 through different systems and software.	Pros: They addressed almost 22 issues that retailers faced. Cons: All the software and methodologies they suggested were notcost effective and couldn't be used bysmall scale retailers.
	Abu Hashan MdMashuda,Sujan Miah,YoefDaryant oc,Ripon K.Chakrabortty,S. M.MahmudulHasa n,Ming-Lang Tseng	Sept 2021	This study investigates how intensification of the COVID-19 affects the retailer's profit. Study about the interrelation of vaccination and covid outbreak in transportation. This model provides the decision making on efficient uses of green technology.	Pros: This study considers product deterioration, time-dependent holding costs, price-dependent demands and carbon emissions from vehicle operation and intends to establish a harmonious relationship among these attributes. Cons: This study failed to show how COVID-19 affects customers purchases instead of the effects on the transportation system.
